Corona, California | 951-818-2101 | <https://kolten-bierman.com/> | koltenbierman@gmail.com

Skills

Networking & Infrastructure: TCP/IP Networking • IPv4/IPv6 • Subnetting & VLAN Architecture • Routing & Switching Fundamentals • Network Segmentation • Switch & Fiber Infrastructure Documentation • Network Topology Mapping

Systems Administration & Enterprise Technologies: Windows 10/11 & Windows Server • Red Hat Enterprise Linux (RHEL) • Ubuntu Linux • Active Directory Domain Services (AD) • Microsoft 365 Administration • System Logging & Monitoring • Identity & Access Management

Technical Systems & Installation: DMX Lighting Systems • Animatronics Integration • Pneumatic Control Systems • Projection Mapping • Microcontroller Programming • Automation Systems • Show Control Technologies • Technical Systems Troubleshooting

Project Management & Documentation: Microsoft Project • Gantt Scheduling • Budget Development & Cost Estimation • Project Scheduling & Timeline Management • Technical Documentation • Infrastructure Mapping • Vendor & Contractor Coordination • Resource Planning

Design & Engineering Software: Revit • AutoCAD • Fusion 360 • Visio • SketchUp

Professional Experience

Entertainment Manager | Castle Park | Riverside, CA

September 2023 - March 2026

- Conducted facility-wide infrastructure surveys to identify, document, and map network switches, communication nodes, and fiber pathways, improving visibility for troubleshooting and future expansion projects.
- Assisted with the installation, routing, and deployment of network cabling, hardware enclosures, and low-voltage systems across operational environments.
- Served as the primary technical liaison during live events, communicating infrastructure status and operational updates between management, technical teams, and external vendors.
- Installed, configured, and troubleshot DMX lighting systems, pneumatic controls, microcontrollers, and show-control equipment to maintain operational reliability.
- Led and coordinated a workforce of more than 100 employees, managing staffing assignments, project priorities, and real-time operational needs during high-attendance events.
- Supported project planning, scheduling, and cross-functional coordination for large-scale special events.

Technical Projects

Enterprise Infrastructure Project

CSUSB

- Collaborated in the design, deployment, and maintenance of a multi-segment enterprise network supporting business-critical services and high-availability operations.
- Implemented WAN, DMZ, and internal LAN architectures utilizing routing, switching, and network segmentation.
- Deployed and administered Active Directory Domain Services for centralized user management, endpoint administration, group policy management, and role-based access control.
- Integrated SQL databases, Microsoft 365 services, business applications, and monitoring platforms to support enterprise operations.
- Configured firewall access control policies and network segmentation strategies based on least-privilege principles.
- Implemented Wazuh SIEM monitoring to collect logs, identify anomalies, and support incident response.

CSUSB Penetration Testing & Vulnerability Assessment Project

CSUSB

- Conducted an authorized internal security assessment across enterprise network segments, Active Directory infrastructure, and corporate systems.
- Identified and documented security vulnerabilities affecting Windows Server, PostgreSQL database environments, and network infrastructure.
- Evaluated remote access technologies including WinRM and SSH to identify credential exposure risks and administrative access weaknesses.
- Performed vulnerability validation, risk analysis, and remediation planning using industry-standard methodologies and CVSS scoring.
- Produced professional client-facing reports detailing findings, business impact assessments, and prioritized remediation recommendations.

Education

Bachelor of Science in Information Systems & Technology

Graduated: May 2026

Cybersecurity Concentration — California State University, San Bernardino
